

GLP-certified EU-approved reference laboratory

- FHAIVE conducts high-quality research and has published more than two centuries of original articles with its predecessors. FHAIVE has received several significant competitive research grants from the EU and the Academy of Finland, among others.
FHAIVE is the Finnish Centre for 3R (EU Directive 2010/63), which promotes the replacement, reduction, refinement of animal testing through its own research and validation work and through training and information sharing.
- FHAIVE's activities are in line with the Sustainable Development Goal of Finland and the EU to move towards a green and digital society.
- FHAIVE's staff has over 20 years experience in *in vitro* methods. Tests can be performed as GLP or non-GLP studies (
- We also offer comprehensive computational services for predictive and systems toxicology and pharmacology
